WI RELESS INDOOR SIREN SA681S

The wireless indoor siren can be installed in a fast and easy manner in the house where a loud siren is desirable during an alarm-notification. The siren is only suitable for wireless alarm systems which operate on 868 MHz. If the indoor siren is combined with an extensive alarm system then a confirmation beep and light signal are given when the system is turned on/off. That is an ideal option when the system needs to be installed in an "invisible" manner. Also, the indoor siren is mounted in a sturdy plastic casing and protected against sabotage for optimal extra security.

CONTENTS OF THE PACKAGING (1)

- a. Indoor siren
- b. Batteries 4x C

MOUNTING/INSTALLATION

- Open the back-plate by turning the screw loose. (2)
- Mount the back-plate in the desired location (3).
- Place the batteries in the learn button and pay attention to the + and - . Unit will flash 1X to indicate (4).
- Now, the external Wire Free siren needs to be adjusted in the alarm power station and turn-on (See description of the power station).
- The adjusted house code of the power station will now be self-learned. Now, press the learn button (5) and hold. After the long beep, the alarm will be activated (by pressing the panic button). House code of the power station will now be stored. After a few seconds, the indoor siren will be disconnected as the learn button is released.
- If this does not take place at once, wait a few minutes and repeat the procedure nearby the power station or briefly press the tamper switch of the SA681S and reactivate the alarm by pressing on the panic button on your remote control.
- Turn-off the alarm: after a few seconds the indoor siren will also stop.
- Now, set the desired volume with the jumper (6) mounted = high volume, remove = low volume.
- With the Tamper Jumper, a possible sabotage may be disabled. We recommend not removing the jumper.
- Now, mount the unit on the mounting plate and tighten the screw.

USE
The SA681S will now depend on the power station. If the alarm goes off, then the indoor siren will also go off a bit later. Within the extensive systems, the indoor siren will still give a confirmation beep + flash if the system is turned on/off. If the green LED flashes in a cycle of approximately 8 seconds, then the batteries must be replaced. The house code is memorized and does not need to be re-programmed.

RESET HOUSE CODE

Press the learn button and release it after a long beep. Again, in this position press within 6 seconds the learn button and hold until a long beep is heard.

TIPS

- First, test the indoor siren in the desired mounted location. Range and sound are always situation dependent.
- Siren may only be placed in dry areas.
- The Indoor siren can be combined with a wireless outer wall casing SA68G.
- Test the indoor siren, every 3 months, to ensure a smooth operation.

SPECIFICATIONS

Frequency	: 868MHz
Power	: 6 volts 4x C Size Alkaline batteries
Battery life time	: About 1 year
Siren	: ca105dB
Flashlight	: ca 60/min.
Range	: 35m effective max. 75m

GB PRODUCT GUARANTEE

This product has factory warranty according to EU regulations. Guarantee lasts for the number of years shown on the packaging, starting from the date of purchase. Keep the receipt - proof of purchase is required in order to rely on guarantee. In the case of problems, please contact with the store where you purchased the product. For further product information call to our Hotline or visit our website: www.smartwares.eu. You can also register your product there.

DI SPOSAL

Correct Disposal of This Product (Waste Electrical & Electronic Equipment) (Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed of with other household wastes at the end of its working life. To prevent possible harm to the environment or human health, please separate this item from other wastes and recycle it through your local material resources Households users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmental safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

- * Always throw empty batteries to the battery recycling bin.
- * If the battery is built-in inside the product, open the product and remove the battery.

MAINTENANCE

The devices are maintenance-free, so never open them. The guarantee is valid for 3 years. Please do not damage the surfaces of the devices with a soft, dry cloth or a brush. Prior to cleaning, remove the devices from all voltage sources. Do not use any carboxylic cleaning agents or petrol, alcohol or similar. These attack the surfaces of the devices. Besides, the vapors are hazardous to your health and explosive. Do not use any sharp edged tools, screw drivers, metal brushes or similar for cleaning. **Warning:** Protect the battery against fire, too much heat and sunshine.

SAFETY

- * Make sure that all electric connections and connection cables meet the pertaining regulations and are in conformity with the operating instructions.
- * Do not overload electrical outlets or extension cords, fire or electric shocks can be the result.
- * Please contact an expert in case you have any doubts about the mode of operation, the setup or the functioning of this appliance.
- * Keep all parts away from young children's reach.
- * Do not store this item on wet, very cold or warm places, this can damage the electronic circuit boards.
- * Avoid direct sunlight, this can damage the electronic boards.
- * Never remove damaged power cables! In such a case, remove them from the net and take the devices to a workshop.
- * Repairs or opening of this item may only be performed by an authorised workshop.
- * Wireless systems are subject to interference from cordless phones, microwaves, and other wireless systems. Please keep the device in a 2-GHz range. Keep the system AT LEAST 10 ft away from the devices during installation and operation.
- * Do not swallow batteries. Keep batteries out of the reach of children.
