1 Getting started
Thank you for purchasing this TOPCOM product. This product has been designed and assessed to meet the needs of our customers and their children, we aim to do our best to help saving the environment. This is why we decided to reduce the number of pages of our user guides and product manuals. In this short manual provided with your TOPCOM device you can find a brief explanation of how to install and use your TOPCOM device. If you need more information about your device, please visit our website (www.tristar.eu) where you can download the complete user manual in your language. By doing this TOPCOM hopes to do its share to make our planet a better place, but we can only succeed with your help!

1.1 Installing / Removing the belt clip
To remove the belt clip from the unit, push the belt clip (B) towards the antenna, while pulling the clip (A). When re-installing the belt clip, a click indicates that the belt clip is locked into position.

1.2 Installing the batteries
Open the battery compartment. Push the latch (C) downwards. Place the battery. The battery pack label will indicate the correct position of the battery.

Before closing the battery door, check the rubber seal around the battery compartment. Make sure that the seal is in good condition and that there is no foreign matter under the seal.

Close the battery compartment door and lock the battery door by using the latch.

2 Charging the batteries
The battery has a built-in drop-in charging convenience.
Put the desktop charger on a flat surface.
Plug one end of the supplied adapter into an easy accessible electric socket and the other end into the connector on the backside of the desktop charger.
Make sure that the radio is turned OFF.
Put the radio in the charger.
The charging LED will turn on if it's properly inserted and charging. It will take about 16 hours to fully charge the Ni-Mh battery.

Do not short-circuit the batteries or dispose in fire. Remove the batteries if this device is not going to be used for a long period. Do not charge non rechargeable batteries like Alkaline batteries in the charger. This might damage the PMR's and charger unit.
